Subject index

Volume 64 (2001)

Acceptance; Nursing documentation; Nursing process; Evaluation study; Nursing care plan; ICNP **64**, 187

Activity modeling; Usability; Electronic patient record; Anesthesia; Cognitive ergonomics **64**, 157

Amblyopia; Electronic patient information system; Pilot evaluation; Quality of care; Qualitative research methods **64**, 1

Anatomical atlas; Virtual operation planning; Atlas based segmentation; Registration **64**, 439

Anatomy; UMLS; Description logics; Pathology **64**, 207

Anesthesia; Usability; Electronic patient record; Activity modeling; Cognitive ergonomics **64**, 157

Angio; Ultrasound; Image; Compression **64**, 473

Arden; Guidelines; Information model; Electronic health record; Workflow management; HL7; Decision support **64**, 259

Atlas based segmentation; Anatomical atlas; Virtual operation planning; Registration **64**, 439

Attitude to computers; Organizational change and impact; Evaluation; Qualitative methods; Social interactionism; Decision support; CDSS; Clinical decision support systems; Clinical practice guidelines; Social science; Psychiatry information systems; Sociology of technology; Organizational innovation; Organizational culture; Diffusion of innovation; Randomized controlled clinical trials **64**, 39

Attitude to computers; Software design; Medical records systems; Computerized; Questionnaires; Interviews; User satisfaction **64**, 173

Blood transfusion; Hospital information systems; Hospital records; Quality assurance **64**, 129

PII: S1386-5056(01)00225-8

Cased-Based Reasoning (CBR); Medical knowledge-based systems; Multi Modal Reasoning **64**, 355

CDSS; Evaluation; Decision support; Clinical decision support systems; Clinical practice guidelines; Randomized controlled clinical trials **64**, 15

CDSS; Organizational change and impact; Evaluation; Qualitative methods; Social interactionism; Decision support; Clinical decision support systems; Clinical practice guidelines; Social science; Psychiatry information systems; Sociology of technology; Organizational innovation; Organizational culture; Diffusion of innovation; Attitude to computers; Randomized controlled clinical trials **64**, 39

Clinical decision making; Hospital information systems; Decision support systems; Computer-assisted expert systems; Medical informatics applications; Computers **64**, 369

Clinical decision support; Primary health care; Practice guidelines; Test ordering; Reminder systems; Validation; Knowledge base **64**, 341

Clinical decision support systems; Evaluation; Decision support; CDSS; Clinical practice guidelines; Randomized controlled clinical trials **64**, 15

Clinical decision support systems; Organizational change and impact; Evaluation; Qualitative methods; Social interactionism; Decision support; CDSS; Clinical practice guidelines; Social science; Psychiatry information systems; Sociology of technology; Organizational innovation; Organizational culture; Diffusion of innovation; Attitude to computers; Randomized controlled clinical trials **64**, 39

Clinical guidelines; Medical informatics; Clinical protocols; Diabetes; Electronic patient record; Clinical information systems **64**, 275

Clinical information systems; Medical informatics; Clinical guidelines; Clinical protocols; Diabetes; Electronic patient record **64**, 275

Clinical practice guidelines; Evaluation; Decision support; CDSS; Clinical decision support systems; Randomized controlled clinical trials **64**, 15

Clinical practice guidelines; Organizational change and impact; Evaluation; Qualitative methods; Social interactionism; Decision support; CDSS; Clinical decision support systems; Social science; Psychiatry information systems; Sociology of technology; Organizational innovation; Organizational culture; Diffusion of innovation; Attitude to computers; Randomized controlled clinical trials **64**, 39

Clinical protocols; Electronic healthcare record systems; Internet and genetic medicine **64**, 111

Clinical protocols; Medical informatics; Clinical guidelines; Diabetes; Electronic patient record; Clinical information systems **64**, 275

Cognitive ergonomics; Usability; Electronic patient record; Anesthesia; Activity modeling **64**, 157

Communication; Diabetes; Decision support; Internet; Patient empowerment; Education **64**, 319

Compression; Ultrasound; Angio; Image **64**, 473

Computer-assisted expert systems; Hospital information systems; Decision support systems; Clinical decision making; Medical informatics applications; Computers **64**, 369

Computerized; Attitude to computers; Software design; Medical records systems; Questionnaires; Interviews; User satisfaction **64**, 173

Computerized-digital patient file; Medical record systems; Hospital information system; User-computer interface; Computer user training **64**, 57

Computers; Hospital information systems; Decision support systems; Clinical decision making; Computer-assisted expert systems; Medical informatics applications **64**, 369

Computer user training; Medical record systems; Computerized-digital patient file; Hospital information system; User-computer interface **64**, 57
